

POWERING TEAM PRODUCTIVITY

Tapping Your Working Genius

Facilitator:

Susie Amundson, PhD, OTR, FAOTA

THE PRODUCTIVITY CHALLENGE

When your work tasks are a mismatch with your talents, you can feel underutilized, misunderstood, drained, and unfulfilled in your job. So can your colleagues. It's frustrating.

THE RESPONSE TO THE CHALLENGE

The Working Genius framework quickly identifies the unique gifts of each team member and demonstrates when talents are most crucial in the stages of work. Team productivity increases when teams can better align with their members' geniuses.

Enabling teams to unveil their talents and transform their work together

Working Genius Model + Inventory

The Working Genius model illuminates what your natural-born talents are and where they fit in with the stages of work. The six geniuses – Wonder, Invention, Discernment, Galvanizing, Enablement, and Tenacity – are all equally crucial for accomplishing a team's work. Gaining insights about you and your teammates' working geniuses, competencies, and frustrations will allow you to leverage your talents collectively as a team.

* The Table Group developed the Working Genius model and inventory. Resources and inventory can be found at www.workinggenius.com

Team Take-Aways in a 3-Hour Training

- Discover your working strengths, competencies, and frustrations, individually and collectively
- Grasp insights re: the kind of work energizing you and the type of work depleting you
- Design a Team Map to leverage the diverse skill sets of team members with the stages of work for more productivity
- Increase team appreciation and cohesion
